Policy Document of Environmental audit / Green audit

Environmental audit / Green audit reflects evaluations that help us to identify environmental compliance and management system, implementation gaps, along with related corrective actions. Green audit is a useful tool to determine how and where the most energy or water resources are being used, the type and volume of waste generated and can then considerations be given on how to implement changes and make savings. It can create health consciousness and promote environmental awareness, values and ethics. Overall, it plays a vital role in imparting a better understanding of green impact on campus to staff and students.

Objectives of the audit:

- Understanding the current practices of sustainability with regard to the use of water and energy, generation of wastes, transportation, purchase of goods, etc.
- Establishing a baseline of existing environmental conditions with focus on natural and physical environment.
- Creating awareness among students and staff concerning real issues of environment and its sustainability.
- To strategies create a report that document baseline data of good practices and provide and quality for future.
- To see action plans towards improving environmental suggest improvement in the system to promote safe and clean environment.
- To see whether provisions are made for liabilities arising out of unintentional pollution related damages and their compliance in cases so arose.

Measures taken:

- Conduct Audit from external competent agency.
- Sharing of the Audit report with the Stakeholders.
- Meticulous monitoring of the Audit report by Stakeholders.
